Let's see in
Azure portal

Important notes

- Azure accounts has one year free subscription, so you can take any advantages from azure services such as, deployment in azure, IoT hub etc.
- Customize your yaml file if you need otherwise it will generate based on your dependencies.
- Azure DevOps is actually made for DevOps team in industrial level. You can also control your software version from azure and important thing is that you do not need any other third party tool for any other operations.
